SUMMARY

Full-Stack Developer skilled in building responsive interfaces and efficient backend systems. Strong in JavaScript, Python, Java, and API development. Quick learner with a clean-code mindset and a passion for modern technologies.

EDUCATION

St. Joseph's University <i>M.Sc. Computer Science</i>	2024 - Present <i>Current GPA: 7.55</i>
St. Francis College <i>BCA (Bachelor of Computer Applications)</i>	2019 - 2024 <i>CGPA: 7.68</i>

SKILLS

Languages: HTML, CSS, Java, JavaScript, Python, PHP, SQL
Frameworks / Libraries: React, Three.js, Scikit-learn, Pandas, NumPy
Tools: Git/GitHub, MySQL, VS Code, Android Studio, Arduino IDE, Figma, UE5, Blender

PROJECTS & RESEARCHES

Research Paper – Multi-Feature Based Audio Deepfake Detection Using Paralinguistic Learning - Researched audio deepfake detection by combining paralinguistic feature analysis with ML classifiers; evaluated on synthetic and tampered speech datasets. - Tech: Python, Librosa, Scikit-learn, SVM, Flask.	2025
AI-Based Resume Builder Web App - Built a responsive resume-generation web app that creates professional PDF resumes from user inputs. - Integrated OpenAI's API to auto-generate summaries, skill descriptions, and tailored resume sections. - Implemented dynamic form handling, template rendering, and downloadable file export. - Tech: HTML, CSS, JavaScript, Python (Flask), OpenAI API.	2025
Air Paint – Gesture-Based Drawing App - Built a real-time drawing application controlled using hand gestures detected via a webcam. - Implemented contour tracking and gesture recognition to draw in the air without input devices. - Tech: Python, OpenCV, NumPy.	2025
AI Sentiment Analysis - Built a sentiment analysis system to classify text as positive, negative, or neutral. - Applied preprocessing, feature extraction, model training, and evaluation using ML techniques. - Visualized insights using Power BI dashboards and Matplotlib charts. - Tech: Python, Scikit-learn, NLTK, Pandas, Matplotlib, Power BI.	2025
VirtuAuth – 3D Interactive Login Page - Built a WebGL login interface with Three.js, featuring interactive 3D elements and responsive design. - Tech: Three.js, JavaScript, HTML, CSS.	2025
Maze Runner 3D Game (Final Year UG Project) - Built a 3D maze game in Unreal Engine 5 featuring dynamic obstacles, and optimized gameplay. - Tech: Unreal Engine 5, Blueprint Scripting, C++.	2024
Library Management System (Mini Project) - Created a Python library system with cataloging and issue/return management features. - Tech: Python, Tkinter, SQLite.	2024

EXPERIENCE

3D Environment Artist — One Move Studios

2022 – 2023

- Created high-quality 3D environments for games and cinematic projects using Blender, Maya, Unreal Engine/Unity, and Houdini.
- Designed modular assets, props, lighting setups, and complex scene compositions.
- Collaborated with animators, modelers, and game designers to deliver optimized, production-ready scenes.

CERTIFICATIONS

Web Development with Python — TechByHeart

2023

jQuery — Infosys Springboard

2023

INTERNSHIP

Java Development Intern — InternzLearnz

2024
